

HD **T**YGER®

**The new packer
for rehabilitation of
T -and Y-connections
DN 100-150**

Problem

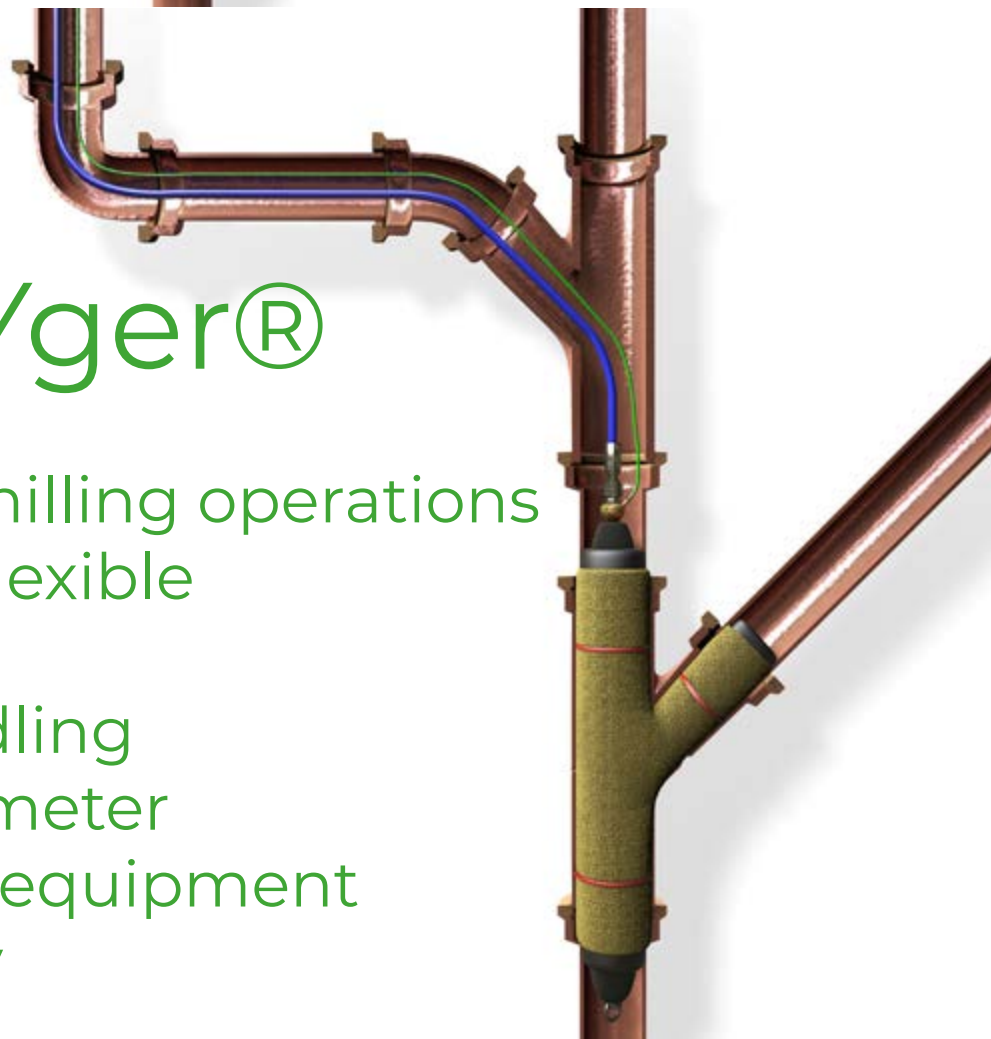

Damaged T- or Y- connection in the field of house connection with fitting and dimension gap

Solution

HD TYger®

- without milling operations
- bendy & flexible
- quick
- easy handling
- small diameter
- only little equipment necessary

Functionality

1

2

HD TYger is a new and unique designed packer system for fast, reliable and easy rehabilitation of T-and Y-Connection in pipes and sewers either with collars or hats. Our system consists of 2 different packers, which provide a range from DN 100 bis zu DN 150.

The functionality of our brand new system is based on 2 independent pressure chambers. This enables the packer and the pulled-over inflating tube to expand separately. It can easily be adjusted and placed at the damaged area. Tight-fitting and flexible collars and hats are available for all common T- and Y-Connections.
