

# HD packer application advices

- no air pressure on packers outside sewer or pipe
- the pipes to be renovated must be cleaned without residues (roots, extending broken pieces of glass, et cetera have to be smoothen with the inner surface of the pipe).
- the packers must not be kinked when stored.
- protect HD packer from direct sunlight
- do not operate with optical damage
- use HD packer with oil-free cold compressed air
- before commissioning, all connections must be checked for tightness and function.
- the maximum operating pressure varies and must be observed according to the technical product data sheet!
- mechanical, chemical or thermal effects must be avoided.
